## Experience

### FULL STACK DEVELOPER/CONTROLS ENGINEER 2022 - PRESENT

#### NYLE.COM / NYLE SYSTEMS

- Spearheaded the development of a cutting-edge mobile app and website to control water heaters, enhancing user accessibility and system efficiency.
- Played a key role in automation testing and data collection processes, ensuring the reliability and performance of the developed solutions.
- Led programming updates for commercial units, implementing advanced features and maintaining optimal functionality.
- Successfully integrated new software functions, such as CTA-2045, to meet industry standards and enhance the overall capabilities of the control systems.
- Collaborated with cross-functional teams to ensure seamless integration between software and hardware components, contributing to the overall success of the projects.

### KILIG DATING 2018 - 2020 |

#### MOBILE APP / WEBSITE | FOUNDER & PM

- Conceptualized, founded, and project-managed a successful mobile app and web app, demonstrating entrepreneurial acumen in the technology sector.
- Oversaw the end-to-end process, from designing to implementing functionality, ensuring a user-friendly and feature-rich experience for both platforms.
- Conducted thorough testing of all updates, meticulously documenting errors and proactively suggesting fixes and updates to enhance application performance.
- Coordinated the seamless implementation of the app for users, including strategic advertising campaigns to drive user engagement and adoption.
- Successfully managed the business to a point of profitability, ultimately achieving a strategic exit through the sale of the company.

### FREELANCE DEVELOPER 2020 - PRESENT

- Enhanced SEO strategies for diverse clients, optimizing content and structure for improved online visibility.
- Led UI projects, refining website flow to deliver an optimal user experience and boost engagement.
- Implemented strategic improvements to elevate website usability and draw increased traffic.
